

RAG Test Document — Engineering Handbook

1. Company Overview

Acme Systems was founded in 2018 and develops software for document processing and enterprise automation.

2. Engineering Team

The engineering team uses Python, FastAPI, PostgreSQL, and containerized development workflows. The backend team owns API development and document ingestion.

3. Product Metrics

In 2025, the document processing service handled 1.2 million documents. The service achieved an average processing time of 2.4 seconds per document.

4. Security

All uploaded documents are validated before processing. API keys are stored in environment variables and are never hardcoded in source code.

5. Hiring

The company hired 14 engineers in 2025. New engineers receive a four-week onboarding program covering the API architecture, retrieval systems, and operational procedures.

6. Contact

The engineering support team can be contacted through the internal support portal during business hours.
